2012 VERACRUZ **REFINED LUXURY**

In creating Veracruz, Hyundai engineers and designers lavished attention on what people want most from a premium crossover SUV: Plenty of power on demand. Comfort that is both sophisticated, and deeply satisfying. And state-of-the-science safety technologies.

Veracruz Limited welcomes you with leather seating surfaces and standard seating for seven, along with amenities typically found only on luxury SUVs with premium price tags. Amenities like a backup warning system, temperature-controlled storage, premium audio systems with standard SiriusXM® Satellite Radio and a power tailgate.

The power of a robust V6 engine paired with an intelligent 6-speed SHIFTRONIC® automatic transmission offers an equally rewarding kind of indulgence. Standard safety features like Electronic Stability and Traction Control Systems keep you confidently in command under difficult driving conditions, while a four-wheel independent suspension absorbs road imperfections to heighten the relaxation you feel behind the wheel.

Yet Veracruz costs thousands less than luxury crossover SUVs. And its quality is backed by Hyundai Assurance services featuring America's Best Warranty.[2] Sure, excellence has its price. It's just a lot more reasonable than you imagined. Welcome to Hyundai.

260 HP

22 MPG[3]

VERACRUZ LIMITED IN SADDLE LEATHER

WELCOME TO YOUR FOUR-WHEEL SANCTUARY.

Meticulous attention to detail. It's evident the moment you open the driver's door, where lower doorsills and expanded headroom make it easy to enter the vehicle. Veracruz Limited's memory settings keep your mirrors, power seat and steering wheel exactly where you want them. The sense of luxury you feel is accentuated by plush leather seating surfaces and a peaceful, serene cabin at speed – the result of a reinforced dash panel, four layers of insulation beneath the carpeting and an electronic motor mount that minimizes engine noise and vibration. The sense of ease you feel in accessing the vehicle's abundant accessories stems from available features like a single-touch Bluetooth® hands-free phone system,[1] simple iPod® connectivity, and more.[2] From the placement and feel of each button to the positioning of vents and handles, everything feels like it was designed with you in mind.

PREMIUM SOUND ALL AROUND

Ten perfectly placed speakers with the available 605-Watt Infinity® premium audio system[3] offer every seating position the kind of high-fidelity sound quality that takes your favorite music or SiriusXM™ programming to an entirely new level.[4]

POWER TAILGATE

Over 86 cubic feet of cargo space is easily accessible, thanks to an available power tailgate that glides open and closes with a keyless remote as well as switches on the tailgate and dash.

COOL STORAGE

A temperature-controlled compartment inside the center console armrest offers a generous amount of space for storing your favorite chilled beverages on the road.

POWER SUNROOF

Bring a sky full of sun or stars inside at the press of a button, thanks to an available power tilt-and-slide glass sunroof.[6]

A GUIDE AT YOUR SIDE

An available Alpine® navigation system[5] does more than plot your course with easy-to-follow maps and spoken directions. It also offers up points of interest and delivers real-time traffic updates.

PROXIMITY KEY

With the available Proximity Entry Key in your pocket or purse, Veracruz senses your approach and unlocks the doors at the press of a button on either of the front doors.

SEATS SEVEN. TREATS SEVEN.

A generously proportioned interior allows Veracruz to comfortably accommodate seven passengers. The luxurious feel of expertly stitched leather seating surfaces is accentuated by heated seat cushions in the front and second row.[1] Climate controls are also extended to second-row passengers, while ventilation ducts run all the way back to the third row. Ensuring a comfortable ride for everyone, regardless of who called "shotgun" first.

POWER AND PERFORMANCE SERVED WITH AN EXTRA HELPING OF REFINEMENT.

Hyundai engineers have spent countless hours putting Veracruz through its R&D testing at our California proving grounds, always with an eye towards instilling the highest levels of refinement. And while we urge you to judge the results for yourself, consider Automobile.com's verdict on our 2011 model: "Safety wise and performance wise, this car is king." [1] Powered by a 3.8-liter V6 engine with 260 horsepower, Veracruz can tow up to 3,500 pounds as effortlessly as its 6-speed automatic transmission finds the perfect gear. The confidence you feel behind the wheel is further heightened by advanced braking technologies that help you rein in power with ease, and by an arsenal of standard safety features that helped Veracruz earn a 5-Star frontal and side crash test rating in 2010.[2]

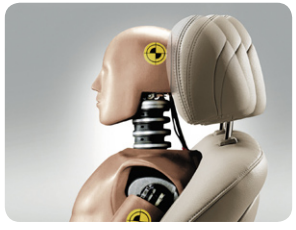
Information Provided by:
DEALER E-PROCESS

UNIBODY PROTECTION

The Veracruz unibody starts with thousands of precise welds for a stiffer frame with less body roll. In addition to improved safety, this exceptionally rigid core offers a smoother ride with more precise handling and a cabin where vibration and harshness are tuned out.

ADVANCED AIRBAG SAFETY

The six-airbag safety system onboard Veracruz features side-curtain airbags that extend to the third row and an Occupant Classification System that detects the size of the front-seat passengers and adjusts inflation accordingly.[3]



ACTIVE FRONT SEAT HEAD RESTRAINTS

If a rear-end collision or emergency braking is detected, front-seat head restraints move upward and forward to protect against whiplash, while the front seatbelts cinch tight to keep occupants securely in place.

ACTIVE SAFETY

The best safety features help you avoid accidents in the first place. Like the standard Electronic Stability and Traction Control Systems that work in concert with the Anti-lock Braking System to deliver razor-sharp agility and improved traction for maneuvering away from potential danger.[4]

ALL WHEEL DRIVE

Using sensors to monitor wheel speed, the driver and the road, this electronic system automatically manages the appropriate amount of torque to every wheel for more control – and confidence – in all driving conditions.[5]

[1] www.automobile.com/2012-hyundai-veracruz-review.html [2] Government star ratings are part of the National Highway Traffic Safety Administration's New Car Assessment Program (www.safercar.gov). [3] The Supplemental Restraint System (SRS) is designed to work with the 3-point seatbelt system. The SRS deploys in certain frontal and/or side-impact conditions where significant injury is likely. The SRS is not a substitute for seatbelts, which should be worn at all times. Children under the age of 13 should be restrained securely in the rear seat. NEVER place a rear-facing child seat in the front seat of a vehicle that has a passenger-side airbag. [4] Electronic Stability Control (ESC) cannot control your vehicle's stability under all driving situations. ESC is not a substitute for safe driving practices. No system, no matter how advanced, can overcome physics or correct poor driving. The driver is always responsible for controlling the vehicle and must use caution to avoid loss of control in all driving conditions. Speed, road conditions and driver steering input will affect whether ESC can help prevent loss of control. See Owner's Manual for details. The Traction Control System (TCS) is meant to enhance conscientious driving habits and is not a substitute for safe driving practices. [5] AWD is optional on the GLS and Limited models.
